DAENERYS (7:00 PM)

Project influencers: Eben Pagan, Dr. Paul Dobranski, Robert Greene, George RR Martin, Hidetaka Miyazaki and Hideo Kojima.

"Since I just made an update on my website I feel obliged to talk about my official 2025 upcoming project called "Daenerys". I am making this game even if I am doing it alone with no help at all...

One of the special things about Daenerys is that the story, characters and gameplay includes a huge homage / inspiration (no plagiarism) to six specific people I am really a fan of. Three of them are from the Self-Development World and Three of them are from the Entertainment World...

Self Development World:

Eben Pagan (David DeAngelo)

DR. Paul Dobranski

Robert Greene

Entertainment World:

Hidetaka Miyazaki

Hideo Kojima

Quentin Tarantino

Project Daenerys is an original story / game of mine but there are endless homage (non-plagiarize) to these six guys, whom I learned so much from these works...

I never planned to do this as a note, but I want to put this out there since I think its important that I mention them since they put so much influence on the overall Daenerys project...

Project Daenerys is my 2nd true love after Cavalier Village and as soon as I am done doing all the things in between, I will continue to make sure this is completed... wait for it.
